

Adraft Workshops:

Attend one of our 2 hour workshops and get specialized training from one of our Autodesk Certified Trainers. These workshops are \$99 per class.

Going forward, workshops will be offered at all of our training locations. For more information, please contact your account manager or Kelly Bourne at 866-769-6163.

Title of Workshop:	Location:	Time:	Date:
AutoCAD Electrical: Template Creation	Rochester	9-11 AM	9/15/10
ACAD Electrical: Custom Schematic Symbol / Blocks Creation	Rochester	2-4 PM	9/15/10
AutoCAD: Dynamic Blocks	Rochester	9-11 AM	9/22/10
AutoCAD Inventor: Template and Title Block Creation	Rochester	2-4 PM	9/22/10

AutoCAD: Dynamic Blocks

Provides a description and explanation of some of the tools used to create dynamic blocks. Dynamic block best practices and examples of what can be accomplished using dynamic blocks will be covered. The workshop will include the hands-on creation of a dynamic block for each student.

AutoCAD Electrical: Title Block Creation

Provides detailed information concerning the creation and usability of a Title Block. This session will show the user how to map an AutoCAD Title Block to a project and how to perform project wide changes to a Title Block. The user will learn about the .wdt and .wdp files which are essential to the mapping of project wide attributes.

AutoCAD Electrical: Template Creation

Provides information concerning the importance of the use of template files when creating new drawing files. The user will create template files that include such variables as drawing properties, wire layers, title blocks and borders, commonly used blocks, ladders, circuits and other graphical entities.

Inventor: Inventor Template and Title Block Creation

Provides an overview to the process of creating templates and title blocks within AutoCAD Inventor. This will also cover best practices on how to leverage intelligence into your templates and title blocks for an increase in productivity while creating drawings

Coming soon:

AutoCAD Electrical: Converting AutoCAD Drawing into AutoCAD Electrical Intelligent Drawings

Provide an overview of converting existing AutoCAD legacy data into intelligent AutoCAD Electrical data. This will include linking title block information to a project, convert drawing lines into wire lines, convert AutoCAD blocks to source and destination arrows and convert blocks to intelligent schematic and footprint symbols.

AutoCAD Electrical and Inventor: Linking Cables between AutoCAD Electrical and Inventor

Provides an overview of the process of communicating data between AutoCAD Electrical and AutoCAD Inventor. This session will also cover best-practices and hands on exercises to insure the most productivity during this handshake.

Inventor: Large Assembly Best Practice Overview

Provides an overview of the methodologies and best practices for working with large assemblies in AutoCAD Inventor. This session will provide information on the different methodologies that can be implemented along with the tools inside of the software will make you successful using these methodologies.

Inventor: Inventor Styles and Standards Overview

Provides an overview of Styles and how to manage them. This will also cover different scenarios with hands on exercises on how to use, manage, and leverage the styles within AutoCAD Inventor.

AutoCAD Mechanical: Top 3 Features in AutoCAD Mechanical

Provide an overview to some of the best features in AutoCAD Mechanical that are sometimes forgotten by users. The following items will be the focus of this course: Power Dimensions, Mechanical Structure, Hide Situation Tools.
